Career Objective

As a motivated student, my goal is to gain practical experience in software development, enhance my technical skills, and apply AI concepts to build intelligent solutions while contributing to impactful projects.

LANGUAGES

- English
- Bangla

SKILLS

- Java, Python & C++
- Data Structures & Algorithms
- Machine Learning, Deep Learning
- Data Analysis
- SQL
- Git & Version Control
- Problem Solving & Algorithm Design

Certificate

- IMUN Internship
- AI in Wireless networks
- FutureNation: Preparatory Online Training on IELTS Listening Module
- Uniatea: Essentials of MS Excel
- SEUI EEE: Latex Unlocked: Research writing workshop

EDUCATION

- BSc in Computer Science and Engineering**
Southeast University | 2022 – Present
Completed 134 out of 150 credits
CGPA: 3.95
- Higher Secondary School Certificate (HSC)**
Shaheed Bir Uttam Lt Anwar Girls' College | 2021
GPA: 5.00
- Secondary School Certificate (SSC)**
Shaheed Bir Uttam Lt Anwar Girls' College | 2019
GPA: 4.94

Academic Project

- Smart Rail

Southeast University | 2026 – Present

Smart Rail is a secure railway ticket resale platform that enables passengers to buy and sell train tickets safely through escrow payments, trust-based user ratings, and real-time chat. Built with React, TypeScript, PostgreSQL, Tailwind CSS, and Supabase, it provides a reliable and transparent marketplace while reducing ticket fraud and scalping.

GitHub Repository: <https://github.com/rabeyakhanba1019v-cmyk/Smart-rail>

- Nutriloop Smart Planner

Southeast University | 2026 – Present

Smart Diet & Leftover Food Management System is an AI-powered solution that helps users eat healthy and reduce food waste by analyzing health data and tracking leftovers to generate smart, cost-effective meal plans. Built with React, Tailwind, and cloud technologies, it addresses real-life issues like poor diet control, rising costs, and food wastage, with the potential to become a smart kitchen assistant.

GitHub Repository: <https://github.com/rabeyakhanba1019v-cmyk/Nutriloop-smart-planner-main>

- Smart Study Planner System

Southeast University | Jul 2025 – Sep 2025

Smart Study Planner System is a C++ desktop application that helps students create optimized study schedules using algorithms like Dynamic Programming (0/1 Knapsack), Greedy, and Job Sequencing. It manages subjects and generates efficient plans based on importance, time, and deadlines, with features like user authentication, CRUD operations, file storage, and performance comparison.

GitHub Repository: <https://github.com/rabeyakhanba1019v-cmyk/Smart-Study-Planner-System>

- **Movie Ticket Management System**

Southeast University | Nov 2024 – Feb 2025

A Java desktop application built with JavaFX and MySQL for managing movies, showtimes, seat availability, and ticket bookings. Features an interactive UI with custom background designs created using Canva. Designed to streamline cinema operations and simplify reservation management.

GitHub Repository: <https://github.com/rabeyakhanba1019v-cmyk/Smart-Study-Planner-System>

- **Student Management System**

Southeast University | Jul 2025 – Sep 2025

Student Management System is a console-based Java application that allows admission officers to securely manage student records. The system supports user authentication, student registration, student search by ID, course advising, and file-based data storage using TXT files. Built with Java, OOP concepts, and file handling, it provides an efficient way to manage student and course information.
